

An overhead view of a modern outdoor dining set on a paved patio. The set includes a rectangular table and four chairs, all made of light-colored wood slats with metal frames. On the table, there is a dark wine bottle, a tall wine glass, a small glass with red wine, a white plate with silverware, and a folded yellow and white checkered napkin. The patio is bordered by a low concrete wall with lush green plants and a white umbrella is partially visible on the right.

# OUTDOOR LIVING

SKAGERAK  
DENMARK

**SKAGERAK**  
**OUTDOOR LIVING**

We live in a world where sustainability is quickly becoming the new normal. Fortunately, change is coming, and that is a good thing because we need to rethink the way we produce and consume. At Skagerak, we strive to act responsibly in everything we do. From the FSC™ certified wood, we use in a majority of our products, to the ten principles of the UN Global Compact Act that focuses on the rights and wellbeing of our employees and suppliers. We are also proud B Corp members, and seek to minimize waste, increase the demand for sustainable products and rethink the way we organize our business.

For more than 40 years we have been crafting long-lasting design pieces with a modern Nordic DNA, and our collection contains both classic furniture that has been with us for decades and new ones that have yet to write history. How we act and react in the world is essential, and to us, people and the planet always come first. We establish sustainable initiatives wherever we can, Reclassic being one of them. One man's outlived furniture is another man's treasure, which is why we take back vintage Skagerak furniture, restore them and send them back into circulation.

At Skagerak, we set the bar high to develop products made with sincere craftsmanship, environmental considerations and a universal aesthetic. We create furniture that is built to survive in the long run, so they patinate and accumulate stories. We strive to make furniture that makes it easy and launch sustainable concepts that can make it a reality.

Welcome to Skagerak  
Jesper and Vibeke Panduro, Skagerak owners.

# MAKING SENSE OF SUSTAINABLE CHOICES

*Can we afford to continue business as usual?  
It might sound ironic, but to keep things the  
way they are – we have to change a lot.*

The world population and global middle class are growing rapidly, and more people are moving to the cities. This will increase the demand for basic goods, housing, energy, heating and water. This wouldn't necessarily have to be a problem – if it wasn't for resources becoming scarce, a rising problem in inequality and climate change. The sum of these realities is, like it or not, that we will have to do way more with a lot less. More products, buildings and power – less pollution, CO<sup>2</sup>-emissions and extraction of virgin materials. Is that possible?

The short answer is yes. But we have to think smart, and adapt. We have to start considering environmental and social performances within society as equally important to economic growth and profit. In fact, these elements are each other's preconditions, not counterparts.

And then we have to stop our endless consumption and waste patterns – and see things for what they really are. For too many years have we thrown out useful and valuable materials. Time has come to stop this linear thinking and start putting stuff into circulation. To design things that can be repaired, reused, decomposed and regenerated.

## What we do in Skagerak

In 2017, we joined the global B Corp movement – looking for new ways to use

our business as a force of good. B Corps are certified 'benefit corporations' meeting high standards of social and environmental performance, accountability and transparency.

For us to join B Corp the goal is not to compete to be the best in the world – but to help each other becoming the best FOR the world. And that is vital, for as a globally operating company, we have a great responsibility for today's development.

That's why we're striving to keep the utmost quality in three aspects: design, production and our relation to people and the planet.

An example of this is our initiative – Reclassic!

To Reclassic something is to pass on a valued item. When one family's cherished classics become a new family's Reclassics. From Skagerak Showroom in Copenhagen, we promote the buying and selling of used Skagerak furniture – some dating 20 years back. This way, we keep valuable material in circulation rather than seeing it being stored away or thrown out unnecessarily. That's good for society and even better for the environment.

You see, we've always designed things to last for generations. But how do we know they will? What happens when people change their surroundings and needs? When they leave their townhouse behind for a new island adventure, or have to move abroad for the job they've always wanted. In these cases, we make it easier to move on without leaving good things behind. To keep calm and Reclassic.

/ CEO Jesper Panduro

Selandia Armchair – a Skagerak classic.

**"TIME HAS COME TO STOP  
THIS LINEAR THINKING  
AND START PUTTING STUFF  
INTO CIRCULATION.  
TO DESIGN THINGS THAT  
CAN BE REPAIRED,  
REUSED, DECOMPOSED  
AND REGENERATED."**

What has become an old classic  
for one person can become a Reclassic  
for someone else.

Let's change the world, one piece of furniture at a time For Skagerak quality means everything. We approach quality as a three-stage process that begins with aesthetics, takes on substance in the choice and treatment of materials and becomes a sustainable unity when proper production processes and conditions are ensured. We are certified as both FSC and B Corp, which means that we honour the demands and principles of sustainable production and business management. We truly believe that quality is here to stay and that we can make positive changes together.

FSC-certified wood FSC is a global non-profit organisation that ensures responsible forestry. FSC means that the workers never fell more trees than the forest can reproduce and the biodiversity of the woods is preserved. FSC also means that the forestry workers are treated respectfully and have proper working conditions, just as FSC supports and cares for the local community. At Skagerak we are committed to expanding FSC-certified forests, so they can supply more FSC wood in the future. At this time it is still a challenge to ensure FSC teak, but we ambitiously pursue our goal of being 100% FSC-certified across all wood types by 2025.

*Skagerak has been FSC-certified since 2003. Our certificate number is FSC™ C004462.*

UN Global Compact As a member of UN Global Compact, Skagerak incorporates fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption. We incorporate the Ten Principles of the UN Global Compact in our strategies, policies and procedures because we believe it makes a difference, and because we want to uphold our basic responsibility to people and the planet. Every year we report our actions directly to the UN Global Compact.

*Skagerak joined the UN Global Compact in 2011.*

B Corp is another priority that we are particularly proud of. B Corp – Benefit Corporation – is about balancing purpose and profit and using business as a force for good. As a B Corp member we set the highest standards for social and environmental performance, accountability and transparency and strive to incorporate these ambitions into our everyday business practices.

*Skagerak was certified as a B Corp business in 2017.*

Reclassic At Skagerak we are dedicated to the products we create and to ensuring their long lifespan. That is why we have invented Reclassic. Reclassic is another way that we enter the orbit of maintenance and sustainability. Skagerak lets you return your old furniture in exchange for a new purchase. Reclassic is our take-back guarantee as a further incentive for you to care for your Skagerak furniture and protect the environment. When you buy a new piece of furniture, you can sell it back to us years later, provided it has been well maintained, and the Reclassic piece will get a new life in a new home.

*Reclassic was initiated in 2017.*

Five Year Warranty At Skagerak, long-lasting design means long-lasting life. Our outdoor furniture is built to last, and it lasts longer and better when it is maintained properly. We offer expert guidance on the best care and maintenance of Skagerak furniture, so you can keep your furniture looking beautiful for many years to come.

*We have a five-year guarantee on our products.*

# PILLOWS & CUSHIONS

Skagerak's outdoor cushions and pillows are made to last – just like the furniture they are designed to accompany, adding comfort to the outdoor space. We use two types of outdoor fabric: Agora and Acrisol.

Agora is a 100% solution dyed acrylic and Oeko-Tex-certified fabric which is extremely colour- and lightfast. Furthermore, the fabric is water, dirt and mildew-repellent.

Acrisol is a 100% acrylic Dralon® fabric, which is extremely colour- and lightfast as well as water- and dirt-repellent. We use this fabric when we need an exceptionally strong outdoor textile and when we want a striped design for our furniture.

For cleaning, wipe the fabric with a firmly wrung cloth. In case of more obstinate stains, remove the upholstery and machine wash at 30° C.

The cushions all have different functions and therefore come in different shapes, textures and sizes. At Skagerak we use three types of fillings: Quickdry Outdoor Foam, Fossflakes and Kapok.

Quickdry Outdoor Foam has an open structure that allows both water and air to pass through. This makes the cushion dry exceptionally quickly – even after a heavy downpour. Moreover,

the foam provides a firm and comfortable texture that remains the same year after year. We recommend placing the cushions upright for quick drainage. Soon after, the cushion will be dry and the cushion can be used again.

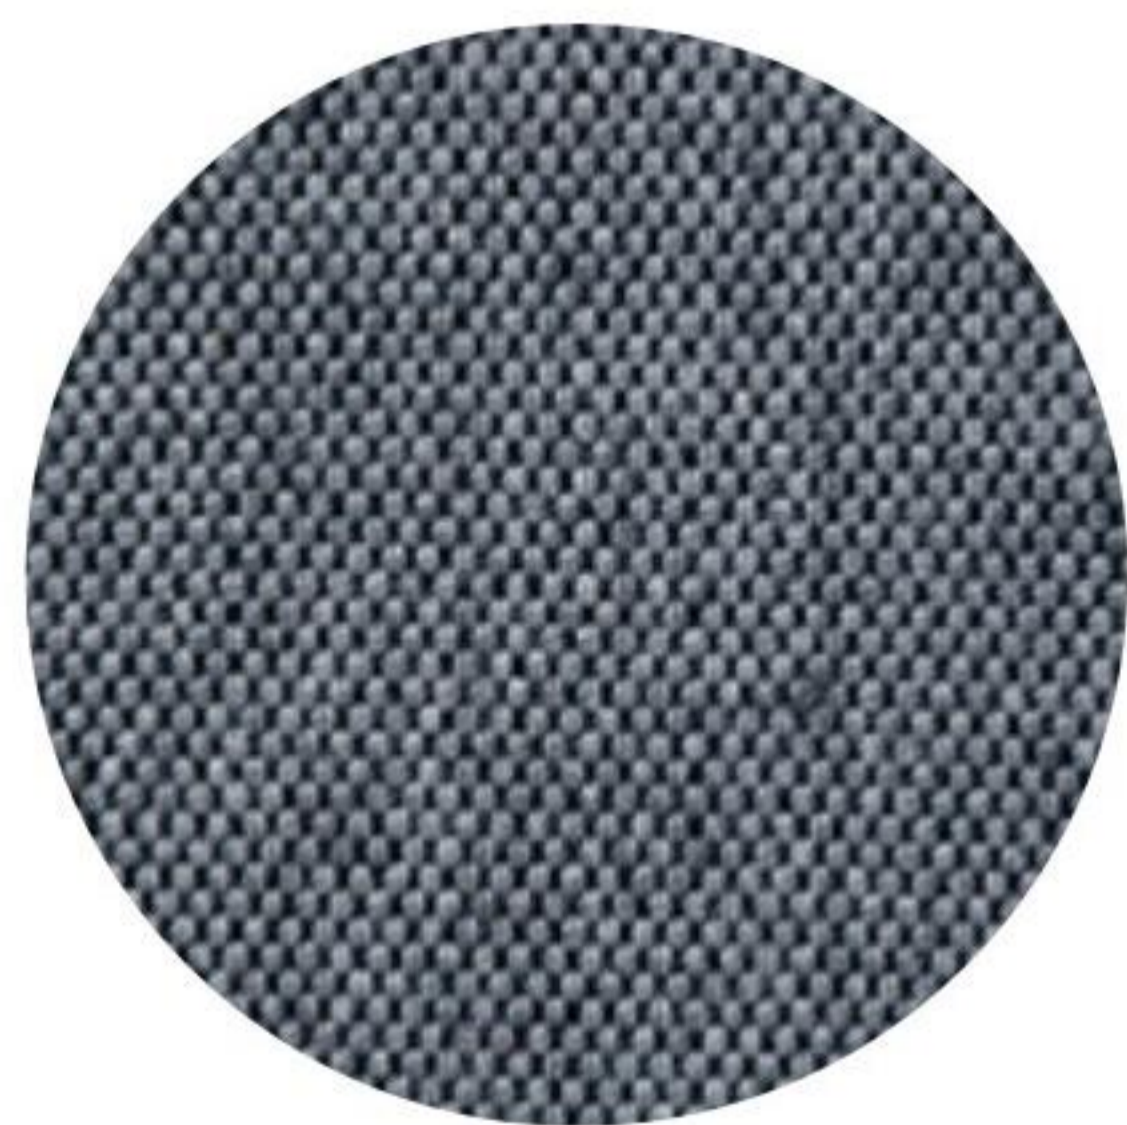

Fossflakes is an allergy-friendly polyethylene known for its superb ability to maintain its volume and shape over time. In addition, Fossflakes provides excellent temperature regulation because the structure of the material allows air to circulate within the cushion.

Kapok is a natural hair-like fibre that is extremely light, water-repellent and hypoallergenic. Our kapok cushions are machine washable at 30° C and should always be tumble-dried at a low temperature to maintain their shape and prevent clumping.

*Important note: Under current UK law, Skagerak is not able to provide outdoor cushions and pillows with the same filling as the regular collection. We still offer cushions and pillows in an outdoor textile with weatherproof properties, but the filling is not weatherproof due to stringent (indoor) fire regulations. We therefore recommend that you bring cushions and pillows indoors in heavy rain and when they are not in use.*

# MATERIALS/ OUTDOOR

Skagerak uses quality wood. Wood that will stand the test of time and is produced under responsible terms and conditions. We mostly use FSC-certified wood, and we work as ambassadors to help increase the number of certified woods to meet the demand. Skagerak is increasing the share of FSC wood in our products every day in pursuit of our ambitious goal of being 100% FSC-certified across all wood types by 2025.

Did you know that the CO<sup>2</sup> contained by FSC wood remains in the timber, even after it has been turned into furniture and is not released into the atmosphere until it is scrapped? This means that if you keep your furniture for 50 years, the CO<sup>2</sup> is contained within the material the entire time.

Teak Quality teak is commonly found in South East Asia and Central and South America. Our FSC<sup>TM</sup> - certified teak comes from Central America and Brazil, while the rest of our teak comes from plantations in Indonesia and Trinidad managed to sustain a renewable and reliable supply of wood. Teak is a heavy, hard and sturdy wood type. The high content of natural oils makes it highly weather- and rot-resistant – perfect for outdoor furniture you want to use outside all year round. If untreated, the teak develops a beautiful silver-grey patina over time.

Kapur This wood type is commonly found in Southeast Asia. The Skagerak Kapur comes from Indonesia and is 100% FSC<sup>TM</sup> - certified. Kapur is a strong, durable type of wood – making it the perfect choice for parasol poles. The parasol pole has been lacquered and the wood comes in a variety of warm colors and patinates very little as time goes by because of the treated surface.

Western Red Cedar This wood type is commonly found in western North America. Skagerak's western red cedar comes from Canada and is PEFC-certified, sourced from sustainably managed forests. Western Red Cedar is a good choice for outdoor furniture as the wood is naturally resistant to bugs and insects, mould, decay and bacteria. As the wood ages, it develops a beautiful silver-grey patina

Powder-coated Steel Steel is a strong, timeless and malleable material enabling designs with thin profiles and various patterns and shapes. To minimize corrosion, the steel is electro-galvanized with a protective layer of zinc and finally it receives a decorative powder coating – a high-quality dry finishing process that provides a stronger and more streamlined surface than conventional liquid paint.

Powder-coated Aluminum Powder coating is a high-quality dry finishing process that makes it possible to create a thicker and more streamlined surface than with conventional liquid paint. A two-layered coat is applied to the light-weight aluminum to make the material resistant to moisture, UV light, scratches and corrosion.

Parasol Fabric Our durable parasol fabric is made from 100% spun polyester. Polyester yarn does not wrinkle or shrink and provides a colour-fast, stain-resistant material. Furthermore, the fabric used in all our umbrellas, except Catania, is Teflon-treated, which makes it water- and dirt-repellent (although it is not entirely waterproof).

**Cura Oil, Nature**  
Skagerak Design

1103043  
Treatment for wood products  
0,5 liter

*When placing untreated wood outside, it will patinate over time and become silver-grey in the end. If you wish to preserve or intensify the original dark/golden/honey brown colour, use Skagerak's natural oil for outdoor furniture. The oil is designed to protect and strengthen wood types such as teak, western red cedar, cherry, and mahogany. As the natural oil saturates and darkens the surface a little, it brings out the natural beauty of the wood and leaves it well-nourished, resistant to water, dirt and grease.*
